

SENIOR QUALITY ASSURANCE ENGINEER

Quality Engineer | Test Automation | Web, Mobile & API Testing

PROFESSIONAL SUMMARY

Detail-oriented Software Quality Assurance Engineer with **3+ years** of hands-on experience in manual and automation testing of large-scale enterprise and e-commerce applications. Strong expertise in test automation using **Java, Selenium with Cucumber (BDD Framework), Katalon Studio, REST API testing, and Agile/Scrum** delivery models. Proven ability to design effective test scenarios, execute automated and manual test suites, and collaborate with cross-functional teams to deliver high-quality software. Passionate about improving software quality, advancing test automation practices, and expanding expertise in DevOps and CI/CD pipelines.

WORK EXPERIENCE

Software Engineer Quality Assurance - IFS R&D International (Pvt) Ltd. | April, 2024 – Present

- Defined and executed comprehensive test strategies for IFS Cloud enterprise software, contributing to 98% defect detection rate across multiple Agile/Scrum sprints
- Designed and executed integration test automation using **TAR (Test A Rest)**, an internal automation tool used for REST-based integration testing.
- Automated end-to-end integration test scenarios to validate service updates, data flow, and system integrations across multiple modules.
- Initiated the adoption and evaluation of AI-based test automation tools such as **Kane AI and Testsigma**, contributing to automation strategy discussions and future roadmap planning.
- Developed and maintained UI automation test scripts using **Katalon Studio** for IFS Cloud.
- Executed manual and automated test suites, including functional, regression, smoke, and negative testing across 3+ major releases and 12+ service updates.
- Analyzed test results and tracked 400+ defects using **Jira-Xray** with 95% resolution rate, collaborating with developers for timely fixes.
- Worked closely with cross-functional teams of 20+ members including developers, product specialists, and user education specialists to maintain product quality.
- Actively participated in Agile activities such as sprint planning, daily stand-ups, reviews, and retrospectives.

Associate Software Engineer (DA) - hSenid Mobile Solutions (Pvt) Ltd. | Mar, 2023 - April, 2024

- Successfully contributed to three enterprise grade e-commerce projects: **appiGo, Applova, and CPaaS**, supporting quality assurance activities across different product domains.
- Performed manual and automation testing for web applications, mobile applications, and POS systems, ensuring functional accuracy, performance, and overall system reliability.
- Developed and executed test automation scripts using **Selenium with Cucumber (BDD)** to improve regression test coverage.
- Conducted API testing using **Postman** and supported performance testing activities using **Apache JMeter**.
- Applied CI/CD principles to support automated testing workflows and streamlined build and deployment processes.
- Gained foundational knowledge in Cloud Services Management, including exposure to **AWS** concepts.
- Worked with a broad technology stack including Java, JavaScript, TypeScript, React, HTML/CSS, and Keycloak, enhancing cross-functional collaboration with development teams.
- Utilized development and testing tools such as IntelliJ IDEA, Postman, and Apache JMeter to support day-to-day QA activities.

Trainee Quality Assurance Engineer - hSenid Mobile Solutions (Pvt) Ltd. | Sep, 2022 - Mar, 2023

- Assisted in the development of test plans, test design, test effort estimation, and the creation of test scenarios and detailed test cases.
- Maintained and executed **functional and regression test suites**, ensuring consistent validation across releases.
- Supported manual testing activities across web-based applications and contributed to test result analysis.
- Gained hands-on experience with the **Linux** operating system, including basic command-line usage for testing and troubleshooting.

EDUCATION

B.Sc (Special) Management Information Systems

NSBM Green University | Dec 2022

Second Class (Upper Division)

SKILLS

Quality Engineering: Quality Engineering Practices, Test Strategy & Test Planning, Test Scenario & Test Case Design, Manual Testing & Exploratory Testing, Functional, Regression, Smoke & Negative Testing, Integration Testing & End-to-End Testing, Defect Analysis & Root Cause Analysis

Test Automation & Tools: Integration Test Automation – TAR (Test A Rest), REST Assured, TestNG | UI Automation – Katalon Studio, Java+Selenium+Cucumber (BDD Framework) | Automation Concepts & Framework Design | AI-based Test Automation Exposure – Kane AI, Testsigma, Test Execution & Reporting

API, Performance & Backend Testing: REST API Testing, API Validation (Request/Response, Error Handling), Postman, Performance Testing – Apache JMeter

Programming & Technologies: Java (Core Java, OOP Concepts), JavaScript, TypeScript, React (basic exposure), HTML/CSS

DevOps, CI/CD & Cloud: CI/CD Concepts & Practices, Jenkins (basic exposure), Git (Version Control), Linux OS (basic command-line usage), AWS (foundational knowledge)

Process & Collaboration: Agile / Scrum Methodologies, Jira (Defect Tracking & Test Management), Cross-functional Team Collaboration, Software Testing Life Cycle (STLC), Stakeholder Communication, Analytical & Problem-Solving Skills

PROJECTS

IFS Cloud – Emissions Management

Role: Software Quality Assurance Engineer

- Worked on an enterprise-scale **sustainability and emissions management** modules used across multiple business domains.
- Actively used AI-driven test automation tools including **Kane AI and Testsigma** to automate test scenarios and share insights that influenced project-level automation strategy and tooling direction.
- Performed integration test automation using **TAR (Test A Rest)** to validate REST-based service interactions and end-to-end data flows.
- Developed and maintained UI automation test suites using **Katalon Studio** for critical business workflows.
- Executed manual, automated, and regression testing to ensure functional accuracy and system reliability across releases.
- Conducted **REST API** validation, including request/response verification, data integrity checks, and error handling scenarios.
- Collaborated with developers and product owners in **Agile/Scrum** teams to ensure timely defect resolution and high-quality deliveries.

appiGo

Role: Associate Software Engineer – Quality Assurance

- Contributed to QA activities for mobile and web-based e-commerce projects (appiGo Retailer, appiGo Pay, appiGo Rush and Restohub), supporting both manual and automated testing.
- Performed **functional, regression, and API testing** to ensure application stability and reliability.
- Assisted in automation testing using Selenium with Cucumber (BDD) and supported CI/CD-driven test execution.

Applova

Role: Associate Software Engineer – Quality Assurance

- Supported QA efforts for a **POS and e-commerce solution, including testing of web, mobile, and POS system components**.
- Executed manual and automation testing to validate end-to-end business workflows and integrations.

CPaaS

Role: Associate Software Engineer – Quality Assurance

- Worked on QA activities for a cloud-based communication platform, validating APIs and backend services.
- Executed integration and regression testing to ensure reliability of messaging and communication workflows.
- Performed UI automation testing using **Selenium** to validate web-based user interfaces and critical user workflows.
